The period in brief

January – March 2020

- Rental income for the period increased to SEK 1,566 million (1,023)
- The real letting ratio for housing was 97.2 percent (98.9)
- Net operating income for the period increased to SEK 857 million (521)
- Cleared of unrealised currency effects, profit from property management amounted to SEK 467 million (236)
- Changes in values of properties amounted to SEK 1,914 million (1,761)
- Profit for the period increased to SEK 1,665 million (1,202)
- Property acquisitions during the period amounted to SEK 14,376 million (3,711)
- Profit per ordinary share amounted to SEK 19 (101)

Comparison amounts in parentheses refer to the corresponding period in the preceding year unless otherwise stated.

Our core values absolutely crucial during Coronavirus crisis

Europe and the world have largely shut down to impede the virus, which is currently having a radical impact on our lives. For us at Heimstaden, which owns and manages people's homes, we must continue providing good customer service in a safe and thoughtful manner during a time in which people's homes also serve as their workplace, preschool and school. The ongoing pandemic is forcing us all to keep our distance, to work and study from home and to hold meetings digitally.

This poses substantial difficulties for those businesses that are otherwise there so that we can meet, socialise and enjoy ourselves. Businesses have, over just a few days, lost their customers, been forced to serve notice to employees, or to dismiss employees or make them redundant. Many entrepreneurs and small business owners are fighting to save their lives' work from bankruptcy.

Heimstaden is more fortunate than many others, as our business meets a basic and long-term human need – people's homes. Alongside the efforts of our governments and public authorities, we are now doing everything we can to help support our tenants and their businesses.

- To increase their chances of survival, we are discussing and adjusting the lease terms for the commercial tenants who have been affected.
- We order work lunches and takeaway food from our restaurant tenants for all Heimstaden employees.
- We are making life easier for our senior tenants over the age of 70 by paying for their home deliveries of groceries.

I am proud that, during these trying times, we at Heimstaden are living as closely in accordance with its values as it did during the strong economic situation prevailing just a few months ago. It is during difficult and challenging times that our organisation is tested and I have been able to see how our employees are dealing with the new situation in a highly constructive and professional manner.

We are now demonstrating, through tangible actions, that our core values, CARE – DARE – SHARE, are more than just words. Heimstaden's

lifelong perspective on ownership and our concern for our customers are cornerstones of our operations. Our corporate culture and our values are what set us apart from many other private housing companies and are absolutely central aspects of our capacity to maintain or increase the value of our company. We are there for those who need help. That makes me both happy and hopeful.

The financial impact on Heimstaden of the Corona pandemic

Of our total annual rental income of SEK 6.8 billion (based on the earning capacity as of 31 March), slightly more than 6 percent derives from our commercial tenants, a significant proportion of whom are public sector tenants, as well as grocers, pharmacies and banks. These are operations that have been affected by the crisis only to a limited extent to date. In our "rescue efforts" for those commercial tenants who, on the other hand, are impacted by the crisis, we anticipate a decline of about SEK 15–17 million in the Group as a whole for the second quarter. This corresponds to about 1 percent of the total rental income for the quarter.

We do not see any increase in unpaid rent among our residential tenants, nor do we anticipate this in the future. It is possible, however, that vacancies will increase to some extent in the short term as viewings of apartments due to be vacated must be managed with social distancing or completely digitally. This takes more time, causing some brief vacancies in connection with changes of tenant.

Rental income and operating expenses in the first quarter

Heimstaden's rental income is in line with the set budget. Operating

expenses in the first quarter were lower than budgeted, which was due to lower heating and electricity costs. This was attributable to the much warmer than normal winter season in the Nordic countries, but also to our attaching considerable focus to the energy optimisation of our properties.

We welcomed our Czech colleagues

On 20 February, on completion of the review by the competition authority and receiving its approval, Heimstaden Bostad took possession of the acquired Residomo. In connection with that, we welcomed 500 new colleagues in the Czech Republic into our operations, with their full-scale operating platform, including property management operations and asset management. With slightly fewer than 43,000 apartments in the Czech Republic, we are now the largest property owner in the country by far. We had planned to conduct a major launch of Heimstaden and our Friendly Homes concept at the end of March, but have postponed this due to the closed borders and other current restrictions. However, our personnel in the Czech Republic are managing the operations excellently during this challenging time.

Growth and organisational development continue

During the quarter, we completed the acquisition of 142 apartments and 9 premises in the Netherlands and work is in full swing to build up our in-house property management organisation and to open our regional offices in the country.

In Sweden, in accordance with our framework agreement with Magnolia, we have now signed an agreement to commence production of 780 apartments in Lund and 225 apartments in Ystad. They will be excellent complements to our current properties and property management organisations in these locations.

During the quarter, we recruited two new country managers. Eddo Rats (Netherlands) and Michael Byrgesen Hansen (Denmark) will be excellent ambassadors in our efforts to brighten and simplify life with friendly homes.

Outlook for 2020

The corona pandemic and its continued development will affect the future economy and unemployment. Today, it is difficult to gain an overview of how serious and deep the crisis will be. One thing we do know, however, is that

Heimstaden provides homes, which are something that everybody needs regardless of the economic situation. Housing shortages also prevail in the markets in which we operate. Providing housing in attractive locations, at rent levels that most residents can demand, means we have a fantastic and flexible product. Rental apartments offer a straightforward housing solution in difficult times, requiring neither cash down-payments or mortgages. That being said, we feel confident in our efforts to continue providing an ever-better customer experience and to be available to our residents.

Heimstaden also has the economic opportunities and strength to continue our journey of growth in challenging times and, through continued new production, to alleviate the increasing shortage of specifically capital-free housing, namely rental apartments.

Patrik Hall
CEO, Heimstaden AB

Significant transactions and events

Heimstaden's property stocks are managed in six geographical segments – Sweden, Denmark, Norway, Germany, the Netherlands and the Czech Republic. On the balance sheet date, the total value of Heimstaden Bostad's property portfolio amounted to SEK 132 billion, excluding agreed acquisitions. Listed below are the significant transactions and events agreed by the Group in the first quarter, as well as the significant transactions agreed in earlier periods but where the Group has gained control of the assets in the quarter at hand.

5 February

Heimstaden has successfully issued additional hybrid bonds for SEK 1,000 million within the Company's hybrid bond loan (ISIN SE0012455111), meaning that the total outstanding volume is SEK 4,000,000,000, within a framework amount of SEK 5,000,000,000. The new hybrid bonds were issued at a price equivalent to 103 percent of the nominal amount, corresponding to a variable interest rate of STIBOR 3m +518 basis points until the first redemption date. The hybrid bond has a perpetual maturity, with the Company's first opportunity for refinancing occurring in about 4.7 years' time.

20 February

Heimstaden's subsidiary, Heimstaden Bostad AB takes possession of a Czech housing portfolio acquired through the acquisition of the RESIDOMO Group, comprising 4,515 properties with 42,584 apartments and 1,675 commercial premises. The portfolio properties are located mainly in the Moravia-Silesia region, which is the most densely populated region in the Czech Republic after Prague, the capital city, and encompass a total 2.6 million square metres of lettable space.

The purchase consideration agreed amounts to approximately EUR 1.3 billion. The loan-to-value ratio will be maintained at a level supporting the current credit rating as well as efforts to achieve a higher rating.

Major renovation and upgrade programmes have been carried out over the past ten years and Heimstaden Bostad will continue to develop and upgrade the portfolio and the management of its properties in accordance with its Friendly Homes concept.

15 January

Heimstaden's subsidiary Hemistaden Bostad has issued a debenture loan under the existing EMTN programme. The nominal amount was EUR 500 million with a maturity of six years and an interest rate of 1.125 percent. The additional liquidity will be used for general corporate purposes.

4 March

Heimstaden's subsidiary, Heimstaden Bostad AB acquired the Magnolia Bostad's Slipsen project in Södra Råbäck, in the Municipality of Lund. The project entered production in December 2019 and includes the development of approximately 780 apartments with a total 45,000 square metres GLA. The estimated property value on completion is approximately SEK 1.4 billion.

24 March

Heimstaden's subsidiary Heimstaden Bostad AB acquired Magnolia Bostad's Vrakbåten project in Västra Sjöstad, Municipality of Ystad. The project entered production in December 2019 and includes the development of approximately 225 apartments. The estimated property value on completion will amount to approximately SEK 400 million.

31 March

Heimstaden's subsidiary Heimstaden Bostad AB is expanding its portfolio in the Netherlands with the acquisition of 142 homes from Dam-Borg. The property value amounts to approximately EUR 44 million.

The portfolio comprises 62 apartments in the regulated sector and 80 residential units in the liberal sector. The buildings are spread between 21 wholly-owned complexes, 15 located in Rotterdam and 6 in Amsterdam.

Covid-19

The coronavirus outbreak was officially recognised as a pandemic by the World Health Organisation (WHO) on 11 March 2020. In the markets where Heimstaden operates, Covid-19 has resulted in lower economic activity and caused higher uncertainty regarding anticipated economic development. In all of Heimstaden's markets, governments have implemented financial and social measures to support companies and individuals who are particularly affected by the crisis. During the first quarter of 2020, the operational and financial consequences for Heimstaden were limited and the Company is well positioned to deal with any adverse effects that may arise in the short to medium term.

On 31 March 2020, the rent from commercial properties accounted for approximately 6 percent of Heimstaden's annual rental income. For many of Heimstaden's commercial tenants, strict rules regarding social distancing and closures have led to lower activity, which is expected to result in reduced rental income for Heimstaden in the short to medium term. For the second quarter of 2020, the impact is estimated to be in the range of SEK 15-17 million, which corresponds to approximately 1 percent of the total expected rental income for the quarter.

Reduced economic activity and rising unemployment are leading to an increased risk of delayed payments and increasing vacancies in the short term. These risks are, however, mitigated largely by regulatory measures including lower interest rates, temporarily increased unemployment benefits and economic stimulus packages. Heimstaden does not foresee any significant financial impact in the short term, but sees uncertainty associated with the duration and ramifications of the ongoing pandemic and its impact on Heimstaden's customers and markets.

Globally, the recovery rate is expected to vary between regions and countries and is dependent on the effectiveness of government measures aimed at protecting the health of the population and stimulating

the economy. All of Heimstaden's residential markets are fundamentally financially strong, facilitating expansionary fiscal policy and significant financial incentives.

Heimstaden has considerable financial flexibility with its strong balance sheet and liquidity position. As of 31 March 2020, the Company had an equity/assets ratio of 45 percent and a loan-to-value ratio of 44 percent. The Company also held cash and cash equivalents SEK 7,527 million, as well as SEK 11,453 million in unutilised lines of credit.

The Board of Directors and management of Heimstaden continue to monitor the situation carefully and are prepared to implement measures to secure the Company's financial position depending on how the situation develops. Despite the recent financial turmoil, Heimstaden's long-term strategy and prospects remain unchanged, and there are indicators of positive long-term development in all countries where the Company operates.

Heimstaden's assessment is that there have been no major changes in its financial risks as a result of the Covid-19 pandemic. See the 2019 Annual Report for a review of risk factors.

Current earning capacity

In the adjacent table, Heimstaden presents its earning capacity on a twelve-month basis as per 31 March 2020. Earning capacity is not a forecast for the current year or for the next 12-month period and should only be regarded as a theoretical snapshot and is presented for illustrative purposes only. Current earning capacity does not include an assessment of future trends in rent levels, vacancy rates, property costs, interest rates, changes in value, acquisitions or sales of properties or other factors.

Current earning capacity is based on the properties held as per 31 March 2020 and their financing. Accordingly, the current earning capacity illustrates Heimstaden's annual earnings on that basis. Consequently, transactions where Heimstaden gains access after 31 March are not included in the calculation.

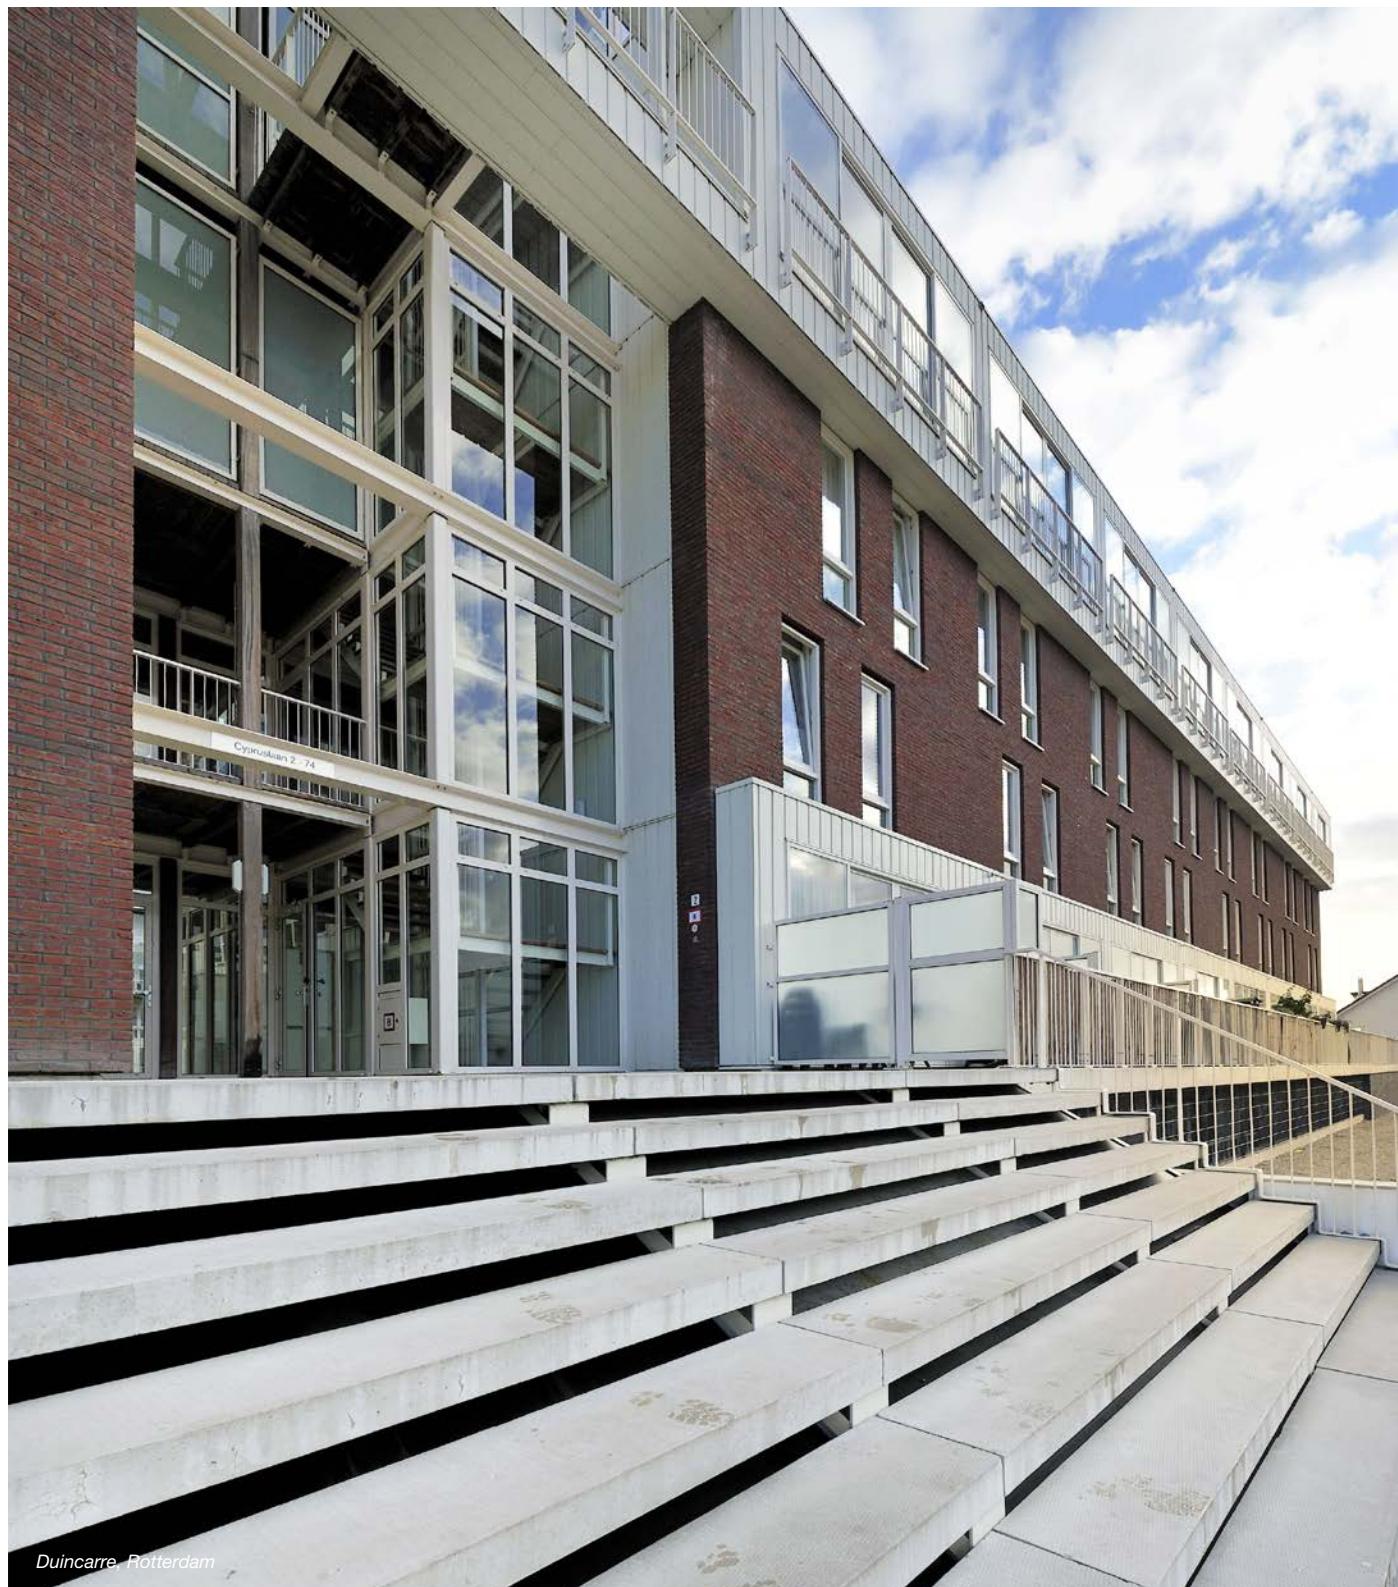

Heimstaden's Income Statement is also affected by the development in the value of the property portfolio and future property acquisitions and/or property sales. Changes in values of derivatives is another item affecting profit. None of the above has been taken into account in the current earning capacity, nor in the item Profit from participations in associated companies.

Earning capacity is based on the contracted rental income, current property costs and administrative costs of the property portfolio. Costs for interest-bearing liabilities have been based on the Group's average interest rate on the balance sheet date, including the effects of derivative instruments.

Current earning capacity as per 31 March 2020

Denmark

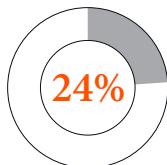

THE SEGMENT IN BRIEF

- Rental income for comparable property holdings has increased by about 8 percent compared with the previous year.
- During the period, properties were acquired for a value of SEK 693 million.
- The unrealised value development in the property portfolio for the period was a negative 0.6 percent, driven by a legislative proposal related to renovations and rent levels for older housing.
- The yield requirement in the valuation was 3.6 percent.

MARKET DATA – DENMARK

Over the past 12 months, the population of Denmark grew by 0.4 percent.

Copenhagen was the growth engine, showing a population increase of 1.3 percent.

The high degree of urbanisation and the positive population growth in Copenhagen ensured a significant demand for housing and supported rental levels over the year.

GDP growth in 2019 was about 2.3 percent. Unemployment was measured at 3.7 percent, still a low level compared with other European countries.

Other comprehensive income		-768	904	432	-1 239
Comprehensive income		897	2,106	6,433	5 224

Rental income

Rental income for the period amounted to SEK 1,566 million (1,023), corresponding to an increase of 53 percent. This growth is primarily attributable to property transactions that have been implemented in the Netherlands and the Czech Republic. Rental income averaged SEK 1,206 per square metre of time-weighted area (1,434). The lower average rent is primarily explained by the acquisitions in the Czech Republic and the Netherlands where the rent level is lower than in the rest of Heimstaden portfolio. Comparable portfolios show an increase of about 5 percent.

The letting ratio for housing was 94.8 percent (96.7) for the period. Adjusted for the acquisition in the Czech Republic, the letting ratio was 97.3 percent. Adjusted for the intentionally vacated apartments, the Group's real letting ratio was 97.2 percent (98.9).

Property costs

Total property costs amounted to SEK 709 million (502). The change is mainly attributable to an increased volume of properties. Property costs averaged SEK 542 per square metre of time-weighted area (705). The lower average is primarily explained by the acquisitions in the Netherlands and the Czech Republic. Comparable portfolios show largely unchanged costs per square metre.

Net operating income

Net operating income amounted to SEK 857 million (521) for the period, corresponding to a surplus ratio of 54.7 percent (50.9). The higher surplus ratio is attributable primarily to the acquisition made in the Netherlands in the second quarter of 2019.

Central administration costs

Costs for central administration amounted to SEK 65 million (29), with the increase mainly being attributable to the growth of the organisation as a consequence of a larger property portfolio.

Financial costs – interest-bearing liabilities

Financial costs for the period were SEK 325 million (242). The increased financial costs are mainly attributable to a larger loan portfolio as a consequence of a larger property portfolio. On the balance sheet date, the average interest rate on the total borrowings, derivatives and fees for unutilised credit amounted to 1.8 percent (2.0). Despite a higher interest hedging ratio, the lower average interest rate is a result of lower credit margins on bank loans and debenture loans, as well as changed base rates. At the end of the period, Heimstaden's interest rate hedging ratio was 72 percent (50).

On a rolling 12-month basis, the interest coverage ratio was 2.5 (2.6). The acquisition in the Czech Republic is contributing positively, but has not had a full impact 12 months back in time.

About 40 percent (60) of the portfolio will switch interest rates within a year and a change in the base rate (Euribor, Stibor, Cibor, Nibor) of 1 percent at any given time would, all else being equal, increase Heimstaden's interest costs (adjusted for the interest rate hedging secured) on an annual basis by approximately SEK 166 million (270) were rates to

rise, and decrease them by approximately SEK 62 million (116) in the event that interest rates were to fall.

The difference in sensitivity is explained by several credit agreements containing interest rate floor clauses restricting interest rate changes on the downside, such that the base rate cannot, for example, be negative while costs regarding outstanding and purchased interest rate derivatives can increase when market interest rates are negative.

Other financial costs

Other financial costs pertain primarily to costs of a non-recurring nature related to new borrowings and redemption of loans.

Currency gains and losses

Currency gains and losses amounted to a net gain of SEK 118 million (loss 63) and relate primarily to unrealised exchange rate differences on cash and cash equivalents, and to receivables, liabilities and associated currency hedges in the Parent Company.

Profit from property management

Profit from property management increased to SEK 584 million (172). The higher profit from property management is mainly explained by acquisitions, as well as improved net operating income in existing holdings. Cleared of currency gains and losses, profit from property management increased by 98 percent compared with the preceding year.

Change in value of investment properties

After currency adjustment, the total change in value regarding properties amounted to SEK 1,914 (1,761). This corresponds to a 1.5 percent increase in value over the year. The yield in valuation averaged 3.73 percent, compared with 3.63 percent at the end of 2019. Cleared of the effect associated with the acquisition of the Czech portfolio, the yield requirement was 3.55 percent in the rest of the holdings.

Changes in the value of financial instruments

In accordance with the established financial policy and interest rate hedging strategy, Heimstaden uses interest rate derivatives and basis swaps to manage the Group's interest rate and currency risks. The change in value related to interest-rate derivatives during the period amounted to a negative SEK 129 million (313). Currency effects related to currency hedging of debenture loans are reported on the line Currency gains and losses.

Tax

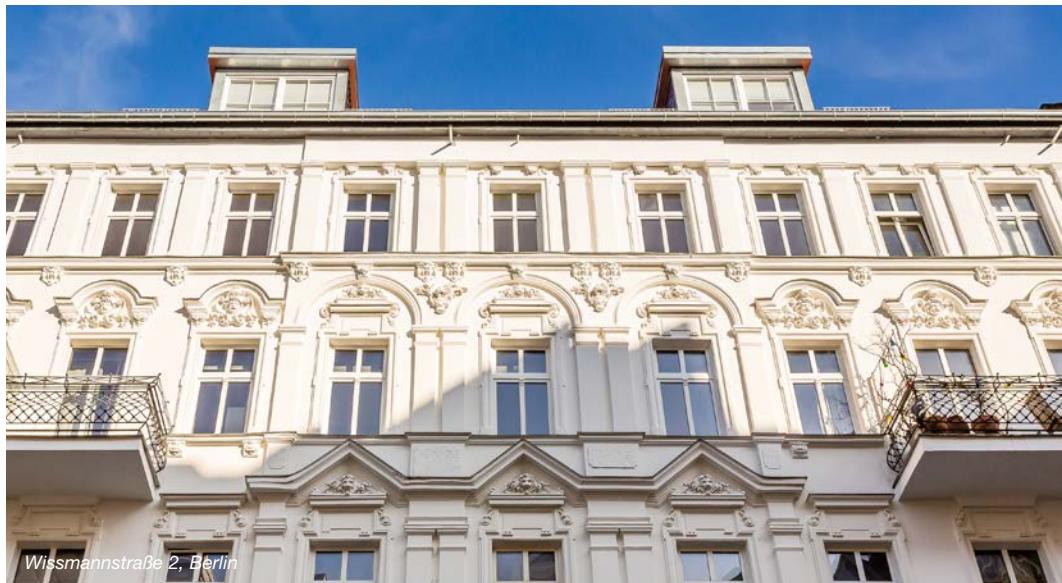

The positive value trend in Heimstaden's property portfolio and a positive unrealised currency effect on derivatives brought an increased deferred tax liability, impacting earnings negatively by SEK 524 million (324). Current tax amounted to SEK 146 million (94).

Other comprehensive income

Other comprehensive income consists of currency translation differences arising from the consolidation of the Group's foreign subsidiaries and amounted to a negative SEK 768 million (positive 904).

Investment properties

On the balance sheet date, the market value of Heimstaden's property portfolio amounted to SEK 131,745 million, compared with SEK 113,719 million at the end of 2019. During the period, properties were acquired for a value of SEK 14,376 million, most of which concerns the acquisition in the Czech Republic. Total unrealised changes in value for the period amounted to SEK 1,933 million, corresponding to a change of 1.5 percent. The remaining change in the carrying amount of the property portfolio comprised investments in existing stocks and exchange rate effects.

For a more detailed description of Heimstaden's methodology for valuing properties, see pages 116-117 of Heimstaden's 2019 Annual Report.

Leases, right-of-use

Leases primarily concern site leaseholds that, as of 2019, are reported as assets in accordance with IFRS16.

Financial instruments

Financial instruments consist of derivative instruments for interest rate and currency hedging and are primarily attributable to the currency hedging of Heimstaden's debenture loans.

Participations in associated companies

Heimstaden holds shares in Rosengård Fastigheter and a number of minor development projects.

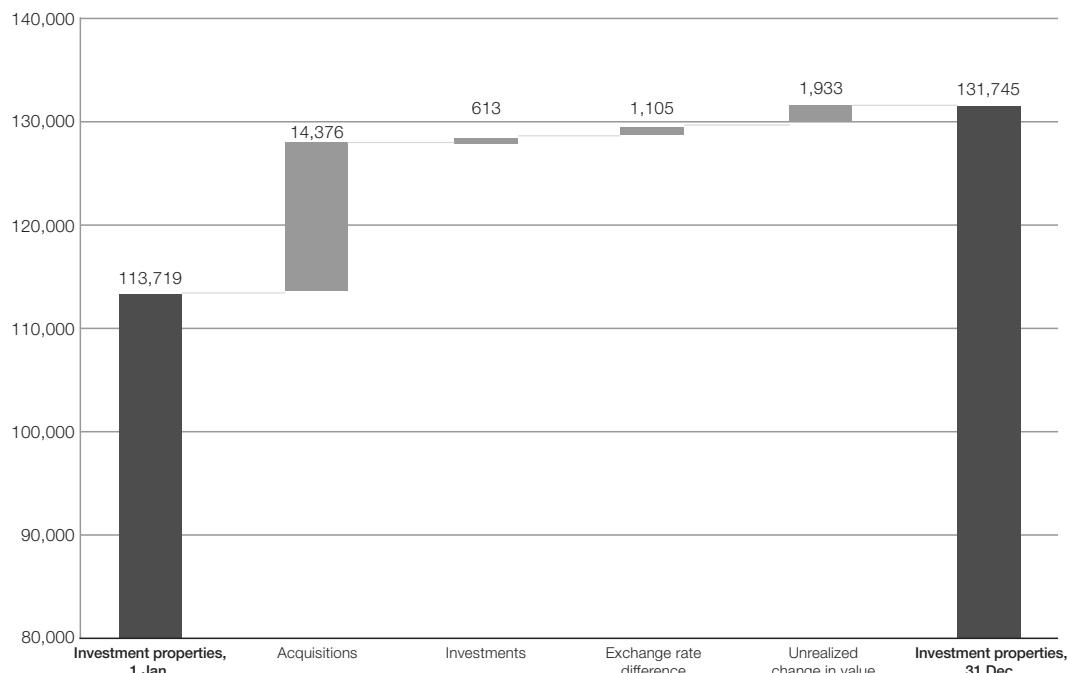

Other financial non-current assets

Other financial assets refer to loans provided to associated companies, as well as acquired, construction projects in progress to which Heimstaden has not yet gained access. These amounted to SEK 667 million (580) at the end of the period.

Development properties and tenant-owned apartments in progress

In connection with the acquisition of Norwegian investment properties, building rights and ongoing construction projects were also acquired. The item concerns the development and construction of condominium apartments in Oslo that are to be divested upon completion.

¹⁾ Heimstaden presents the nominal value of hybrid bonds with issue costs deducted.

Interest-bearing liabilities

At the end of the period, Heimstaden's loan-to-value ratio was 44 percent (40). Of the total interest-bearing liabilities, 60 percent (66) were loans secured by property mortgages, giving a loan-to-value ratio for secured loans of 29 percent (32).

The total loan portfolio amounted to SEK 71,006 million (61,946) on the balance sheet date. Of this amount, 40 percent (34) pertains to debenture loans, 32 percent (32) to mortgages and 28 percent (34) to traditional bank loans. There are also unutilised lines of credit of SEK 11,453 million (10,269).

The average period for which capital is tied up regarding Heimstaden's interest-bearing liabilities amounted to 10.3 years (10.1). The largest proportion of loan maturities within an individual year will occur in 2021 (2021) and accounts for 14 percent (17) of the total portfolio. At the same time, the average period of fixed interest, including the effect of derivatives, amounts to 2.5 years (2.6).

Deferred tax liability

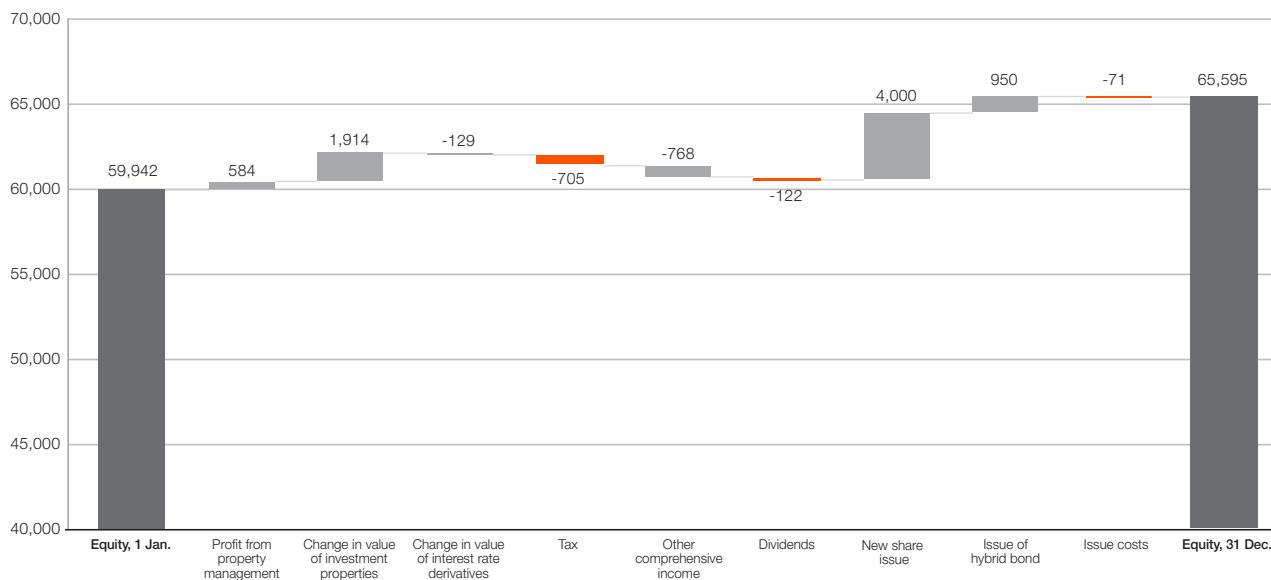

The positive value trend in Heimstaden's property portfolio brought an increased deferred tax liability, amounting on the balance sheet date to SEK 4,215 million (3,640).

Equity

Equity amounted to SEK 65,595 million (59,942), giving an equity/assets ratio of 45 percent (47). The change in equity over the period is primarily attributable to new issues of shares and hybrid bonds.

Heimstaden is exposed to currency risk in EUR, DKK, NOK and CZK. This risk is associated with the foreign operations and to financing denominated in EUR in the Parent Company. The Parent Company's debenture loans in EUR have largely been hedged through swaps to the same currency as the assets that the loans are intended to finance. The currency risk associated with the foreign operations is limited to net capital in each currency.

EQUITY DEVELOPMENT OVER THE YEAR¹⁾, SEK MILLION

Closing cash and cash equivalents	7,527	6,265	10,687

Operating activities

Cash flow from operating activities, before changes in working capital, amounted to SEK 279 million (125). The increase is primarily attributable to a larger property portfolio. After a reduction in working capital, cash flow from operating activities amounted to SEK 313 million (negative 239).

Investing activities

Cash flow from investing activities was negative in the amount of SEK 7,246 million (2,055). Most of the flow consists of corporate and property transactions, of which most are attributable to the acquisition in the Czech Republic.

Financing activities

Cash flow from financing activities amounted to SEK 4,045 million (3,745). The amount is attributable primarily to the new issue of a hybrid bond and to capital contributions from non-controlling interests.

Cash flow

Cash flow for the period was negative in the amount of SEK 2,888 million (1,451) and cash and cash equivalents amounted to SEK 7,527 million (6,265) at the end of the period.

PARENT COMPANY STATEMENT OF COMPREHENSIVE INCOME

¹⁾ Heimstaden presents the nominal value of hybrid bonds with issue costs deducted.

Note 1 Accounting principles

Heimstaden's consolidated accounts are prepared in accordance with the International Financial Reporting Standards (IFRS) adopted by the EU and its interpretations of these (IFRIC). This interim report has been prepared in accordance with IAS 34 the Annual Accounts Act. The Parent Company applies RFR2 Accounting for Legal Entities and the Swedish Annual Accounts Act.

The same accounting and valuation principles and calculation methods have been applied as in the most recent annual report, with the exception of IFRS 3. Heimstaden's 2019 Annual Report contains a more detailed description of the Group's accounting principles.

IFRS 3 Business combinations

On 21 April 2020, the EU adopted amendments regarding the definition in IFRS 3 of a business combination. The classification of an acquisition as either a business acquisitions or an asset acquisitions causes differences in the accounting. The changes introduced in IFRS 3 are expected to result in more acquisitions being reported as asset acquisitions.

The accounting of business acquisitions differs from the accounting of asset acquisitions, with, for example, goodwill not being recognised

in asset acquisitions. There are also differences in the accounting and valuation of supplementary purchase considerations, acquisition expenses and deferred tax. Accordingly, the classification as either business acquisitions or asset acquisitions is crucial when preparing financial reports in accordance with IFRS.

Companies may choose to perform a "concentration test" and, should this prove that the acquisition is an asset acquisition, no further assessment is required. However, the test does not answer the question of whether an acquisition is a business acquisition but can only show if it is an asset acquisition. If essentially the entire fair value of the gross assets acquired can be attributed to an asset or a group of similar assets, the voluntary test shows the acquisition to constitute an asset acquisition. If the test is performed and it is not possible to prove the acquisition to be an asset acquisition, further assessment must be made to determine whether or not the acquisition is a business acquisition.

The criteria for an acquisition to constitute a business acquisition is that there must be financial resources and a substantial process that, combined, contribute substantially to a capacity to generate returns. The new guidance provides a framework for assessing whether there are financial resources and a substantial process. An acquisition including returns and a labour force trained in managing the process constitutes a business. If the acquisition lacks a labour force, it may nonetheless be the case that the acquired process is sufficiently unique or unusual, or costly to replace to be able to generate returns, that the acquisition nonetheless constitutes a business.

Effects of the change and its entry into force

The amendment shall be applied for financial years commencing on or after 1 January 2020. The changes to IFRS 3 entail Heimstaden's acquisitions in the Czech Republic being reported as asset acquisitions.

New and amended accounting principles yet to come into effect

New and amended IFRS accounting principles yet to come into effect have not been applied prematurely in the preparation of the consolidated and Parent Company financial statements. Described below are the IFRS standards that may affect the consolidated or Parent Company financial statements. Other new or amended standards or interpretations published by IASB are not expected to have an impact on the consolidated or Parent Company financial statements.

IAS 1 Presentation of Financial Statements

IAS 1 requires companies to disclose "significant" accounting principles. The IASB proposes that the requirement of "significance" be replaced by a requirement to disclose "essential" accounting principle to clarify the limit of the disclosures to be submitted. The IASB also proposes that IAS 1 be supplemented with guidance to help companies understand what makes an accounting principle essential. Since Heimstaden Bostad's disclosures are considered essential, the changes will not affect the accounting principles. The amendment shall apply to financial years commencing 1 January 2020.

Note 2 Information about related parties

Heimstaden's transactions with related parties are detailed in Notes G 8 and PC-G 6 in Heimstaden's 2019 Annual Report.

Note 3 Events after the balance sheet date

1 April

Heimstaden's subsidiary Heimstaden Bostad has acquired a housing portfolio in the Netherlands consisting of 41 properties, with 2,023 apartments and 60 commercial premises, as well as adjacent parking facilities. The portfolio comprises a total 138,900 square metres of lettable space.

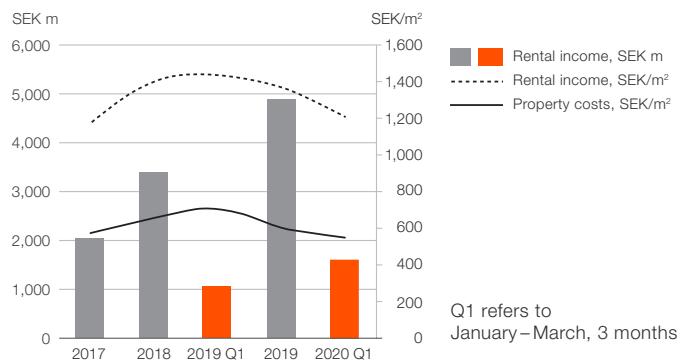

The agreed purchase consideration is EUR 375 million and the transaction is being implemented as a corporate transaction. The transaction will initially be financed through existing cash and capital injections from

existing shareholders. Loan financing will subsequently be secured to cover part of the purchase consideration.

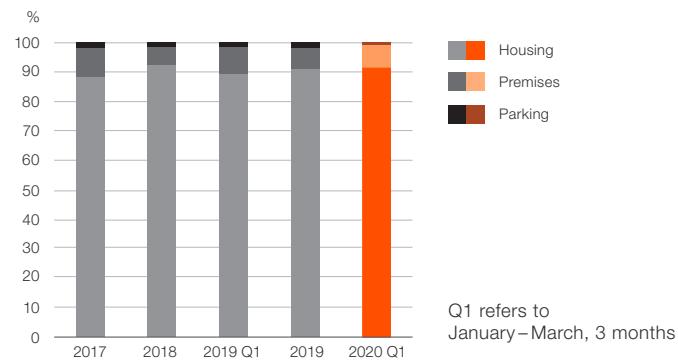

The acquisition fits well with Heimstaden's strategy of providing affordable housing in markets with favourable conditions and will support further operational synergies in the operations in the Netherlands. Following the acquisition, Heimstaden will have a portfolio of approximately 12,600 homes in the Netherlands.

Note 6 Financial income and costs

Risk management, estimation and assessments

The Board of Directors and company management work continuously to achieve the desired risk profile, which is governed by the adopted Financial Policy and established operational targets.

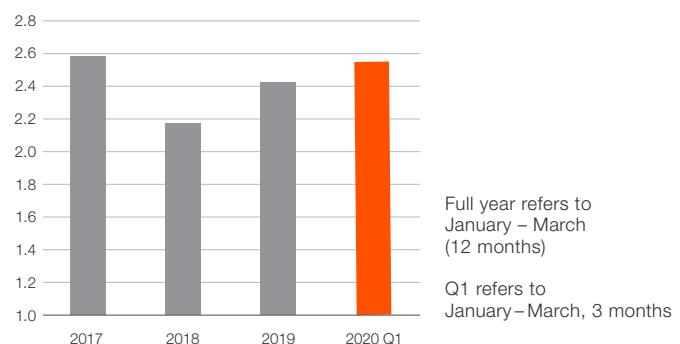

Heimstaden's operations, financial position and profit can be affected by a number of risks and uncertainties. These are described on pages 82–86 of the 2019 Annual Report. No significant changes have subse-

quently occurred affecting the assessment by the Board of Directors and company management.

To prepare the accounts in accordance with generally accepted accounting principles, management must make assessments and assumptions affecting the assets and liabilities reported in the financial statements, as well as income and expense items and other disclosures. Actual outcomes may differ from these assessments.

Market value of investment properties, 31 Mar 2020	131,745	42,657	37,377	15,924	2,413	19,582	13,794

Note 10 Financial instruments

Change in loan volume

Interest-bearing loans, 31 Dec 2019	61,946
Repayments on loans	-1,246
Currency exchange effect on loans	1,583
New borrowing/loans taken over	8,723
Interest-bearing loans, 31 Mar 2020	71,006

	Capital tied up, loans		Lines of credit	
Years	SEK million	Share, %	million	Share, %
Within 1 year of the balance sheet date	5,466	8	-	-
Between 1-5 years of the balance sheet date	33,981	48	11,453	100
Later than 5 years from the balance sheet date	31,558	44	-	-
Total	71,006	100	11,453	100

The average remaining period for which capital is tied up amounts to: 10.3 years

Funding source, SEK m

	Credit	Secured, %	Share, %	Unutilised credit commitment
Bonds	28,484	-	40	-
Mortgages	22,787	100	32	-
Bank loans	19,735	100	28	11,453
Total	71,006	60	100	11,453

Financial instruments

Years	Type	Maturity, interest rate derivatives		
		SEK million	Share, %	Interest, % ¹⁾
Within 1 year of the balance sheet date	Paying fixed	5,472	13	0.04
Between 1-5 years of the balance sheet date	Paying fixed	28,616	67	0.2
Later than 5 years from the balance sheet date	Paying fixed	8,675	20	0.2
Total		42,763	100	0.2

1) The interest rate indicates the agreed average fixed interest in the contracts.
A negative interest rate indicates that we receive fixed interest.

Financial instruments

Years	Type	Maturity, basis swaps		
		SEK million	Share, %	Interest, % ¹⁾
Within 1 year of the balance sheet date	Paying variable	-	-	-
Between 1-5 years of the balance sheet date	Paying variable	13,273	100	2.8
Later than 5 years from the balance sheet date	Paying variable	-	-	-
Total		13,273	100	2.3

1) The interest rate indicates the variable agreed interest rate on the balance sheet date.

Average number of ordinary shares outstanding	13,204,000	13,204,000	13,204,000
Average number of preference shares outstanding	2,343,750	2,343,750	2,343,750

Definitions and glossary

Letting ratio, housing (number), %

Leased housing divided by total number of homes.

Real letting ratio, housing (number), %

Leased housing adjusted for voluntary vacancies due to standard improvements divided by the total number of homes.

Surplus ratio, %

Net operating surplus as a percentage of rental income

Proportion living area on balance sheet date, %

Living area divided by total property area.

Interest coverage ratio (ICR), multiple

Profit before net financial items plus financial income divided by financial costs attributable to interest-bearing liabilities. Calculated based on the rolling 12-month outcome.

Equity/assets ratio, %

Equity as a percentage of total assets.

Loan-to-value ratio (debenture loan covenant), %

Net liabilities as a percentage of total assets.

Loan-to-value ratio, secured loans, %

Secured loans as a percentage of total assets.

Loan-to-value ratio (financial policy), %

Net debt, financial leasing and 50 percent of the capital attributable to hybrid bonds as a proportion of net debt, financial leasing and equity.

Net liabilities

Interest-bearing liabilities less financial assets and cash and cash equivalents.

Average interest, %

Average interest on the balance sheet date for interest-bearing liabilities, with interest rate derivatives taken into account.

Return on equity after tax, %

Profit after tax (rolling 12-month outcome) as a percentage of average equity.

Net asset value on the balance sheet date, SEK m

Equity plus deferred tax liability.

Long-term net asset value on the balance sheet date, SEK m

Equity with deferred tax liability and interest rate derivatives reversed.

DEBT/EBITDA, multiple

12-month average interest-bearing liabilities divided by profit before financial items with reversal of depreciation.

Equity per ordinary share, SEK

Equity at the end of the period, in relation to the number of ordinary shares at the end of the period, after preferential and hybrid capital is taken into account.

Equity per preference share, SEK

The preferential rights of holders of preference share on liquidation of the Company and the remaining entitlement to dividends of those shares.

Profit after tax per ordinary share, SEK

Profit after tax in relation to the average number of ordinary shares once the portion of the profit for the period accounted for by preference shares and hybrid capital has been taken into account.
